

HOW IT WORKS

Anyone can facilitate a CPR & First Aid Anywhere training session in less than one hour. During the training session, CPR and first aid skills are taught with the AHA's research-proven practice-while-watching technique. Participants will practice on a Mini Anne® Plus manikin while observing a demonstration of the skills in the video. The kit comes complete with a facilitator binder that contains the facilitator guide, lesson plans, pre-test and post-test, and additional materials.

KIT CONTENTS

The CPR & First Aid Anywhere Training Kit (AHA product 15-1082) includes:

- 1 wheeled carry bag
- 10 Mini Anne Plus inflatable manikinM AHA
